

KIT CONTENTS

ASSEMBLY

Insert eight sensors to dockings on sleeves and leggings

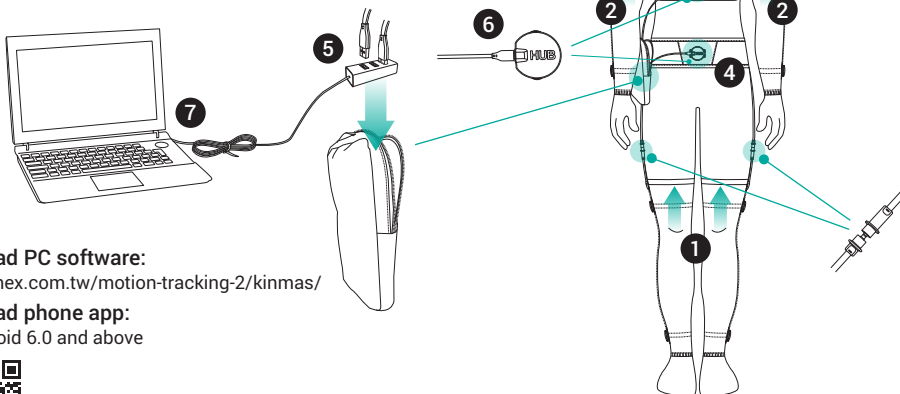

Insert one Sensor Hub to vest
 Insert one Sensor Hub to belt

DRESS UP

- 1 Pull the leggings up above knees.
 ※ For each legging, the zipper should be on the back of the leg and sensor on the side.
- 2 Pull the sleeves up above the elbow.
 ※ The lower sensor should be at the location when wearing a watch and the upper sensor should align with the straight line from the lower sensor to shoulder connector
- 3 Wear the vest, then connect the sleeve connectors with vest connectors on shoulder sides.
- 4 Put on the belt, then connect legging connectors with belt connectors.
- 5 Put the USB hub to the belt packet, then connect the 30cm and 100 cm USB wire with the USB hub, then pull out the connectors of USB hub and USB wires from the upper hole.
- 6 Connect the 30cm wire to belt Sensor Hub and then connect the 100cm wire to the vest Sensor Hub.
- 7 Plug in a 3-4 meter USB extension wire to the USB Hub and connect to the computer USB port.
- 8 Download the software at J-MEX website.
